

Environmental Law Club

The Environmental Law Club of KSLU's Law School makes an effort to sensitize the students to adopt environmental friendly way of life in realization of constitutional goal of protection and conservation of environment. It also organizes various programmes to enrich the knowledge of the students with respect to current developments in environmental law. The club provides platform for the students to develop their oral presentation skills, analytical & reasoning ability. Latest legislations passed by the legislature, amendments made to the existing environmental legislations, judicial pronouncements, important environmental issues like usage of plastic and its impact on environment, ground water pollution, etc. are some of the areas being discussed and deliberated in the club.
